

The Project Catalog Management Tool aims to connect product catalogs in order to show a clear journey from manufacturer to patient. It establishes master data that includes GS1 identifiers, global categories, and mappings to local identifiers. This enables end-to-end visibility, allows shipments to flow between systems, and helps supply chains perform.

## General Details

### PRIMARY USERS:

Product managers, national regulatory bodies, pharmacy data managers, logistics managers

### REACH OF TECHNOLOGY:

PCMT is being used to manage product catalogs at the national level in multiple countries, and in two global organization implementations to coordinate catalog identifiers across member countries.

### LANGUAGES:

English, French, Italian

### TYPE:

Software Application

### OPEN SOURCE LICENSE:

NOSL-3

## Access Information

### SOURCE CODE

<https://gitlab.com/pcmt/pcmt>

### WEBSITE

<http://productcatalog.io>

### CONTACT

[josh.zamor@villagereach.org](mailto:josh.zamor@villagereach.org)

## WHO System Classification

### PRIMARY

C9 | C9 Product catalogues

### ADDITIONAL

# Maturity

All maturity model assessments are self-reported by the funded organization leading the software development of the global good.

## Maturity Matrix: 2023

### Global Utility

Country Utilization	Medium
Country Strategy	Medium
Digital Health Interventions	High
Source Code Accessibility	High
Funding and Revenue	Low

### Community Support

Developer	Low
Community Engagement	Low
Community Governance	High
Software Roadmap	Medium
User Documentation	High
Multi-Lingual Support	High

### Software Maturity

Technical Documentation	High
Software Productization	High
Interoperability and Data Accessibility	High
Security	Medium
Scalability	Medium
